Lipper LANA

Please review the minimum hardware configuration requirements for hosting LANA 5.2. Note that in network installations it is highly recommended that a virtual server be utilized.

Lipper LANA is available for new installations or upgrades exclusively as Version 5.2. Earlier versions of LANA are required to be updated to Version 5.2 for continued support.

Minimum Technical Requirements

Product Name	Lipper LANA
Release Number	Version 5.2

	NETWORK SERVER
Processor	Dual 2.8 GHz Xeon or faster or Virtual Server with comparable resources available
